

# Outdoor Learning

Forest Schools gives children the opportunity to work in and learn about the outside environment. It allows learning to take place using the natural resources available around the school and it develops the children's individual skills alongside teambuilding and leadership.

Children learn about working safely outside. Sessions include how to design and build shelters, for both humans and animals. They also use natural and found materials creatively to support English and Maths skills and increase their knowledge of the outside environment.

Year 1 had lots of fun building their shelter!
