

Day 6: Wolverhampton Science Park.

During the final day, the children attended an event at the science park. This was a day where the children would reflect on what they have learnt and how they have developed throughout the programme.

During the morning, the children completed a spider diagram explaining how they have developed and how they have applied the skills they have gained to everyday life. The children completed a survey to evaluate the programme and reflect on what they have accomplished.

The children were given the opportunity to stand up and speak with a microphone to inform all of the other children of their successes and achievements.

During the afternoon, the children met with the author of the SUMO book: **Paul McGee**. The children took this opportunity to ask him questions and work with him to complete a range of activities and challenges.

Lastly, the children were presented with their certificates and thanked for all of their efforts and involvement throughout the programme .
