

THE ROLE OF THE PASTORAL MANAGER

The role of the Pastoral Manager is to support the welfare of children and their families in school. Pastoral support comes in different ways as a way of creating a nurturing environment for children experiencing difficulties, which may be affecting their learning and behavior.

My role supports and recognizes these difficulties and I look at ways in contributing to ensuring that the children and families feel valued and supported as much as they can be. The positive aspect of my role is that all my time is based outside of the classroom, which allows staff to work collaboratively with myself so issues can be addressed with immediate affect.

In addition, it allows parents to be able to contact me throughout the day with any matters that may arise. We are dedicated to building positive relationships with our children and parents so that they have the reassurance there is a safe and suitable environment for them in our school.
